

ANKUSH BOSE

Lead Android Engineer | Bangalore, India
+917003540623 | ankushbose5@gmail.com | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Lead Android Engineer with a 9+ year experience in scaling native Kotlin and Jetpack Compose applications for millions of users. Bridges the gap between product requirements and technical execution by architecting robust systems, integrating APIs, and mentoring developers. Enforces engineering standards through coding standard practices, leveraging AI assisted development to accelerate team velocity and build maintainable code.

TECHNICAL SKILLS

Android:	Kotlin, SQL, XML, Jetpack Compose & Components, Room, LiveData, WorkManager, Navigation, DataStore, Paging, Android SDK, Material Design, Kotlin Multiplatform (KMP/CMP), Wear OS
Architecture & Patterns:	MVVM, MVI, MVP, Clean Architecture, SOLID
Networking & APIs:	RESTful APIs, Retrofit, OkHttp, JSON, Certificate pinning
Testing & Quality:	JUnit, Mockito, Mockk.io, Espresso, Compose UI testing, ATDD, SonarQube
Tooling & DevOps:	Android Studio, Git, GitHub, Jenkins, CI/CD Pipelines, Firebase (Crashlytics, Analytics, Remote Config), Play Console, JIRA, Confluence, Agile/Scrum
Leadership & Tooling:	Firebase, Teamcity, Jira, Confluence, Claude, GitHub Copilot, AI assisted code review, test generation, and documentation

PROFESSIONAL EXPERIENCE

Senior Software Engineer, Wipro

August 2024 – Present | Bangalore, India

Client: Stellantis — Space connected car Android application (1M+ downloads)

- Leading a software engineering team as the Android Technical Lead for the onboarding domain, managing project delivery and utilizing software project management skills to plan and execute client focused solutions.
- Developed heterogeneous onboarding flows by overseeing the integration of APIs and microservices, supporting FCA and PSA brand vehicles across diverse connected car ecosystems.
- Built secure vehicle-to-user association via QR code scanning with Google ML kit, Coroutines and Flow for asynchronous, concurrent state handling, streamlining account activation for end customers.
- Owned operational support and incident resolution for launch gating production defects across Opel, Lancia, and Jeep releases, using Logcat, Android Profiler, and Memory Analyzer to diagnose memory leaks, ANRs, and performance regressions.
- Set team standards for AI assisted engineering (Claude, GitHub Copilot) in code review, test acceleration, and documentation.
- Mentoring teammates through structured code reviews, pair programming, and technical training sessions.

Senior Consultant, Capgemini

August 2021 – August 2024 | Kolkata, India

Client: HSBC UK — Mobile Banking Android application (5M+ downloads)

- Designed and delivered a reusable Android language SDK from the ground up, enabling dynamic, runtime language switching across 10+ global languages. This architectural enhancement streamlined localization rollouts and eliminated application restart requirements for a multi million user banking platform.
- Directed customer data modeling initiatives by developing the foundational Customer Domain Model plugin utilizing PlatformHub and the Singleton pattern, establishing a robust single source of truth for user state management across the enterprise "North Star" application.
- Partnered with cross functional stakeholders to translate complex business requirements into scalable technical architectures. Championed Agile software quality by guiding engineering teams in ATDD methodologies, optimizing automated CI/CD pipelines, and enforcing strict SonarQube code quality gates.

Senior Associate, WNS Global Services

December 2019 – August 2021 | Bangalore, India

- Migrated legacy Java codebase to Kotlin, modernising the employee HR management Android application and improving null safety, readability, and build maintainability.
- Refactored the application from MVC to MVVM using Jetpack components including ViewModel, LiveData, WorkManager, and Navigation, improving testability and lifecycle handling.
- Led regular code reviews and formally mentored 3 junior Android developers, raising team wide code quality standards.

Android Engineer, Ontrack Technologies

June 2019 – December 2019 | Bangalore, India

- Migrated a legacy Java application from MVC to MVVM, integrating Jetpack components including Navigation, WorkManager, ViewModel, and Hilt.
- Refactored and redesigned the application UI from Adobe XD wireframes, improving usability and reducing screen load times.

Risk Control Analyst, Amazon

September 2017 – April 2019 | Bangalore, India

- Analyzed transactional data patterns to detect money laundering and terrorist financing risk, preparing Suspicious Activity Reports against FinCEN red flag criteria.

EDUCATION

West Bengal University of Technology (WBUT)
Bachelor of Technology, Electrical Engineering - 7.12 DGPA

2013 – 2017 | Kolkata, India

CERTIFICATIONS

- Android Kotlin Developer Nanodegree — Udacity
- Orange Belt Secure Coding Certified — Secure Code Warrior
